

Date:

Dear \_\_\_\_\_

We appreciate the opportunity to have interpreted the \_\_\_\_\_ procedure you had performed on \_\_\_\_\_.

One of our radiologists has made a finding on your recent imaging exam which may require imaging follow-up or at a minimum, a clinical follow-up and discussion with your referring/ordering physician. This finding is not considered emergent, so please allow a reasonable amount of time for your physician to review the final report and contact you. If this has not occurred within two weeks of your exam, please contact your physician at your earliest convenience. Should you have any difficulty, the Concierge at Radiologic of Fredericksburg can be reached at 540-735-9204 or by email at [concierge@rafadmin.com](mailto:concierge@rafadmin.com).

Your images will become part of your medical record and remain on file for your ongoing care. If, in the future, you change health care providers or go to a different location for a radiological exam, please let them know where and when the test was performed.

Sincerely,

The Physicians of Radiologic Associates of Fredericksburg
