

Lower Extremity Graft Duplex

Image Summary

Image	Measurement
1. Patient information screen	
2. Long proximal native artery grayscale	
3. Long proximal native artery color	
4. Long proximal native artery color with spectral Doppler	PSV
5. Long proximal anastomosis grayscale	
6. Long proximal anastomosis color	
7. Long proximal anastomosis color with spectral Doppler	PSV
8. Long proximal graft grayscale	
9. Long proximal graft color	
10. Long proximal graft color with spectral Doppler	PSV
11. Long mid graft grayscale	
12. Long mid graft color	
13. Long mid graft color with spectral Doppler	PSV
14. Long distal graft grayscale	
15. Long distal graft color	
16. Long distal graft color with spectral Doppler	PSV
17. Long distal anastomosis grayscale	
18. Long distal anastomosis color	
19. Long distal anastomosis color with spectral Doppler	PSV
20. Long distal native artery gray scale	
21. Long distal native artery color	
22. Long distal native artery color with spectral Doppler	PSV
23. Documentation of areas of suspected stenosis MUST include representative waveforms recorded before, at and distal to the stenosis.
