

## Infant Hip Image Summary

### Coronal Images:

1. coronal neutral
2. coronal flexion
3. coronal flexion with angle measurement
3. coronal flexion-posterior lip
4. coronal flexion-posterior lip with push maneuver
5. coronal flexion-with adduction
6. coronal flexion- with adduction-push maneuver
7. coronal flexion-with abduction

### Transverse Images:

1. transverse neutral
2. transverse flexion
3. transverse flexion with adduction
4. transverse flexion with adduction – push maneuver
5. transverse flexion-with abduction

**\*\*REPEAT ALL IMAGES FOR THE CONTRALATERAL HIP**

**\*\*\*If possible, obtain a cine clip for each side in the coronal plane showing the hip in motion especially if there are any abnormalities present.**
